Grimaldi Lines has chosen to deploy a RoPax vessel on this line, i.e. *Finneagle*, with 2,500 linear meters of rolling cargo equivalent to 170 trucks. Such capacity will ensure that, even during high season peaks, **boarding priority to all logistics operators will be confirmed**. In addition, the vessel can accommodate 600 passengers per departure.

The deployment of this new unit proves the strong determination of Grimaldi Lines to promote freight and passenger connections from Europe to North Africa, through the performance of a regular line dedicated above all to cargo service. As it is known during this time of the year, significant restrictions to cargo handling are active and as a result delays due to the high number of passengers; Grimaldi Lines instead sets itself apart favoring cargo activities even in high passenger peaks.
